

# Maximize your IT Budget

Boost PC performance and stretch your dollars with memory and storage upgrades

## Why upgrade instead of buying new?

Upgrading memory and storage can dramatically improve your PC and laptop performance for a fraction of the cost of buying new. By choosing to upgrade, you can:

- Improve productivity
- Speed up boot and load times
- Run applications more efficiently
- Extend system life
- Maximize your investment
- Save money for other expenses

## Why Crucial?

Crucial products are built by Micron, a world leader in innovating memory and storage solutions. With Crucial upgrades, you get:

- 3- to 5-year limited warranties on SSDs
- Limited lifetime warranty on DRAM
- Award-winning products
- 40-plus years of experience
